

Rules of Engagement (ROE)

Overview

- The purpose of this document is to outline the Rules of Engagement (ROE) for the credential-harvesting phishing simulation test for Teladoc Health.
- All participants must read, understand, and sign this ROE before the simulation begins.
- The primary objective of the test is to simulate phishing attacks targeting specific email addresses within the organization to assess their vulnerability to credential theft.
- No sensitive data will be compromised during this test. It is designed to identify potential weaknesses in personnel responses and security controls.

Target Email Addresses

The following email addresses will be targeted in the phishing simulation:

- root@teladochealth.space
- dev@teladochealth.space
- hr@teladochealth.space
- finance@teladochealth.space
- sales@teladochealth.space

Scope of Engagement

In-Scope Activities:

- Phishing emails will be sent to the listed target email addresses to simulate credential harvesting attacks.
- The simulation will use cloud-themed messages, such as telehealth alerts and identity management notifications.
- Controlled login portals will be used to capture any credential submission attempts.

Out-of-Scope Activities:

- No access to or exfiltration of actual patient or operational data will occur.
- No lateral movement within production systems.
- No use of malware or payloads.

Sign-Off for Rules of Engagement

By signing below, you acknowledge that you have read and understood the Rules of Engagement for this phishing simulation. You accept the terms outlined above and are authorized to participate in the engagement.

Signature: 
Date: 18/05/2026
Name: Bamidele Ojo
Role: Pen Testing Consultant

Please submit this signed document before the engagement begins.
